

6 U FOR A TELEPHONE SWITCHBOARD

REQUIREMENT

Customer needs a 6U subrack as the basic unit for the telephone switchboard (telephone system) conform to the 19" form factor. Guide rails and modified front panels were also requested.

CHALLENGE

Use as many standard (existing) piece parts as possible from our subrack platform to receive an custom oriented price for the solution. Assemble the guide rails and deliver the modified front panels.

SOLUTION

Customer can use the most of our standard parts. A modified side panel, assembled guide rails build one unit.
