

TEST SYSTEM FOR MANUFACTURING FACILITIES

REQUIREMENT

Interscale M as a test system for manufacturing facilities.

CHALLENGE

The customer needed a standard platform with high flexibility to support development of many different prototypes. Easy access to complete set of STEP files allowed the customer to modify the case according to his specific requirements.

SOLUTION

Easy access to the test boards. Fixing of the test boards. CAD files for the customer. Competitive price for prototypes and larger series.

Project Details

Location	-
Type of system	-
Technology	-
Product scope	First 25 prototypes with potential for large production runs
Date/Time frame	03 / 2014
Contract scope	-
